## DETAILED ACTION

This application has been reviewed. The original claims 1-46 are pending. The restrictions, cited are as stated below:

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-37 are drawn to a system comprising a customizable presentation framework, a plurality of extensible modules, and a software bus.

Group II. Claims 38-46 are drawn to a method comprising inputting data into a customizable framework, selecting actions to be performed on the data, and accessing a plurality of services via an interface.

2. The inventions are distinct, each from the other because of the following reasons:
  - (a) Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention as stated in Group I does not rely upon particulars in Group II as, selecting actions and

assessing services via an interface. The subcombination has separate utility such as selecting actions and assessing services via an interface.

3. The independent claims in each Group I and II recite limitations that are not found together in a common independent claim of the other group, thus it is evidence that Applicant believes a distinct invention combination lies within each set of independent claims. Also, the dependent claims then append a multiple of distinct inventive concepts for which Applicant's submission is evidence that Applicant believes each supports a distinct reason for invention. See MPEP § 806.05(d).

4. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Art Unit: 3691

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different concepts, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the response to this requirement to be complete must include an election of the invention (Group I or Group II) to be examined even though the requirement be traversed (37 C.F.R. § 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
8. A shortened statutory period for response to this action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
